

# Week 5 Lab

This is a **pair** exercise and must be competed in your **tutorial** or **lab** with your partner.

**IMPORTANT NOTE:** Make sure you run `1511 pair` on the lab computer before starting any activities and check that your pair is correctly recorded.

## Lab Partners

This week, everyone will be changing lab partners. Make sure to select a new lab partner that you will work with for the next few weeks.

Please make sure that you create a lab pair group in WebCMS with your new partner.

## In the Lab

There may look like a lot of activities this week, however, this week we are focussing on code reuse. You will find that many of the functions you write in earlier activities can be re-used to help solve later ones.

**Remember:** you may not use any syntax that hasn't been covered in lectures.
